Kosgoda Sea Turtle Conservation Project ("KSTCP")

Dudley Perera's project has been underway since 1988. The main aim of the project is to monitor local sea turtle activity and conserve the local nesting sites. We aim to make the public more aware of how endangered these beautiful creatures are and just how important it is to help protect them before it is too late.

One of the most important activities of the project is its hatchery. Within the sanctuary of the project, collected and rescued eggs can hatch safely away from predators before being released into the sea at night-time. In addition, a certain number from each hatching are kept back for a short period for 'head starting' before release. The hatchery

program is designed to maximize the number of hatchlings reaching the sea and surviving through the critical stages of their early life. Only a few hatchlings from each batch will ever make it to adulthood. Therefore, every nest-ground, every egg, every hatchling, and every turtle is crucial to the survival of the species. Unfortunately, sea turtles face many dangers.

After that proceed to Balapitiya for a Boat Safari at Madhu River.
